

Essential Setup Instructions

Important: Before activating and using your TRS10 or TRS10-UB system, please make sure the following connections are made.

Pre-Installation Checklist

Before you begin:

1. Check Inventory

Ensure you have all the necessary components:

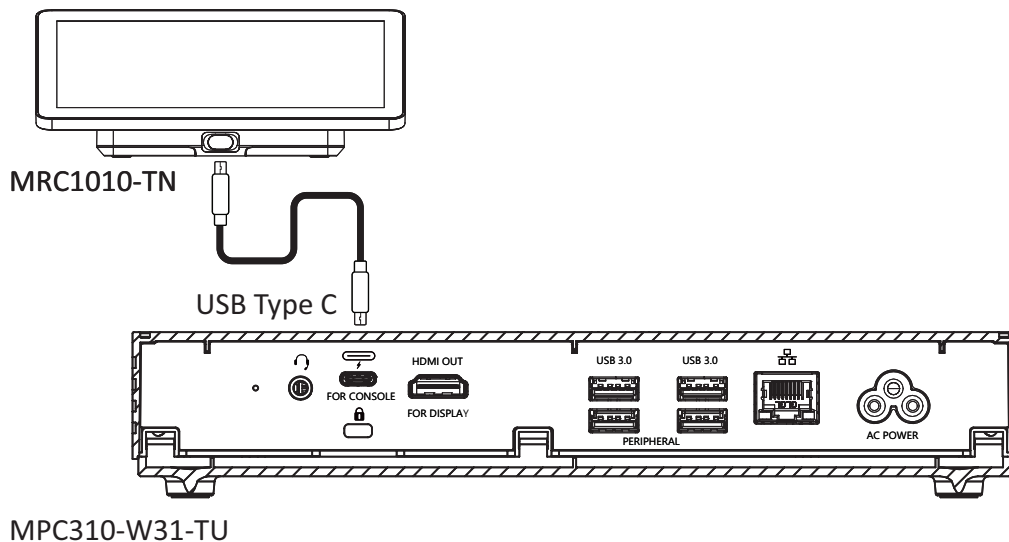

- MPC310-W31-TU Conferencing PC
- MRC1010-TN Touch Console
- USB Type C cable
- RJ-45 Ethernet (LAN) cable
- Power cord

2. Verify Internet Access

Confirm that a reliable internet connection is available at the installation site.

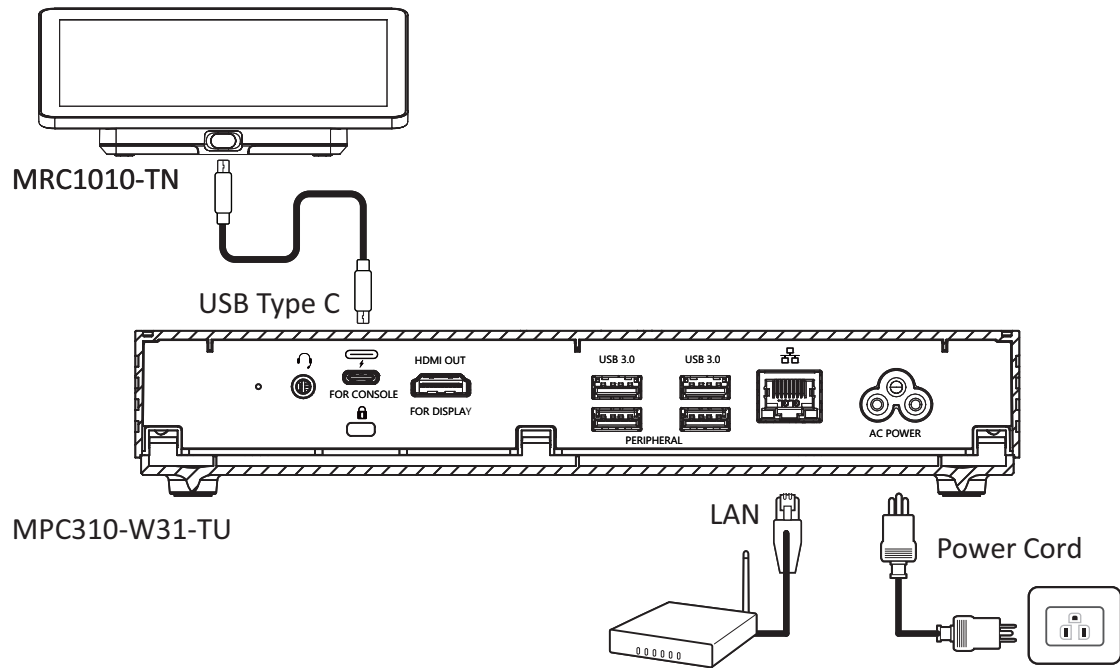

USB Connection

Connect the USB Type C cable from the MPC310-W31-TU Conferencing PC to the MRC1010-TN Touch Console.

Internet Connection

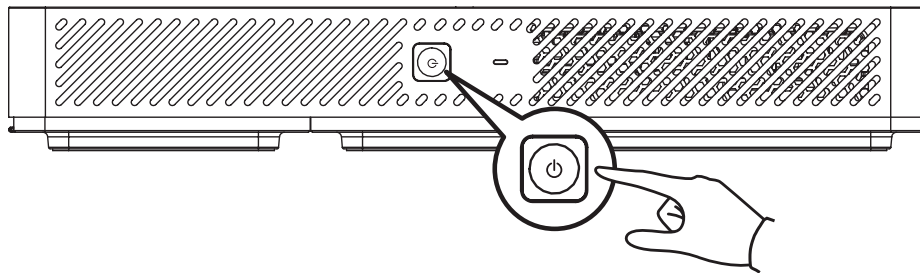

Connect the Ethernet RJ-45 LAN cable from the Conferencing PC to the Internet.

Turn On

Important: An active internet connection is required before turning on the Conferencing PC.

Turn on the MPC310-W31-TU Conferencing PC.

Support and Troubleshooting

- If you encounter issues during installation, double-check cable connections and ensure power outlets are working.
- For further assistance, refer to the product's support documentation or contact ViewSonic's technical support team.
